

Position: Project Engineer

Location: Eagle Mine, Upper Peninsula, Michigan, USA

General Description:

The Project Engineer will be responsible for overseeing all aspects of construction and operational improvements within a specific project scope. The scope of projects will be focused, but of a size too great for the onsite mill operations and maintenance team to oversee and execute.

Key Responsibilities:

- Oversee contractors executing work to ensure projects are completed safely, on time, and in line with budgets
- Active interaction with maintenance, engineering, and procurement teams to ensure an appropriate balance of cost, schedule, constructability, and performance
- Provide project status updates when requested
- Responsible for safety of employees, contractors, vendors, and visitors, as well as compliance with MSHA, and all other safety regulations, policies and procedures
- Interact with appropriate departments across Eagle to ensure key stakeholders stay informed of changes and have sufficient input into project developments
- Ensure that best practices are always used regarding Health and Safety
- Attend HSEC awareness training sessions as required
- Ensure that workplace hazards are identified and controls are implemented and maintained
- Participate in the development of action plans for implementing HSEC objectives and targets within their area of responsibility
- Other duties as required

Skills and Competencies:

- Minimum 10 years of experience in heavy industrial construction supported by a proven record in this industry including direct management of construction consultants, contractors and contracts
- A B.S. degree in an applicable engineering or science related discipline preferred
- Experience in construction of process plants and treatment facilities preferred
- Experience in overseeing consulting engineering teams through options analysis and detailed design
- Ability to lead start up and troubleshooting of new process facilities
- Knowledge of local, state and federal construction and permitting regulations
- An advocate for HSE
- Demonstrable leadership experience
- Able to live and work in the USA

HSE Accountabilities:

The individual in this role will be accountable for ensuring all work undertaken within their area of control complies with the requirements of the HSE Lundin Mining Company Standards according to the implementation strategy. Specifically:

- Ensuring HSE Standards are applied and followed within their area of control
- Ensuring all employees under their control are fully trained and able to perform their duties safely and in conformance with environmental requirements
- Ensuring HSE checks are regularly carried out and ensure all hygiene and safety equipment in their area is operating correctly
- Ensuring all monthly inspections and audits are carried out

Employees are responsible for performing all tasks in accordance with relevant HSE Site Procedures, to work safely and keep the workplace safe. Everyone in the workplace – both employees and employers – is responsible for his or her own safety and for the safety of co-workers. Lundin Mining Company is responsible for determining steps required to ensure health and safety of all employees.

Specifically, all employees must:

- Accept personal responsibility for HSE
- Identify hazards unsafe conditions, unsafe actions and conditions that could result in damage to property, injury or impacts to the environment

- Obey any instruction issued to protect their own personal health and safety, and the health and safety of others
- Report, as soon as practicable to their Manager any situations where HSE requirements are not being conformed to within their work area
- Avoid endangerment to any other person through any act or omission
- Use equipment correctly particularly that provided for health, hygiene and safety purposes
- Report all incidents
- Participate in HSE training provided to them
